

PRESENTATION TO
THE COMMISSION ON HIGHER EDUCATION

DR. GEORGE E. COOPER
PRESIDENT
SOUTH CAROLINA STATE UNIVERSITY

ABOUT SC STATE UNIVERSITY

Since 1896, **South Carolina State University** has maintained a legacy of excellence in education.

We have been home to generations of scholars and leaders in business, military service, government, athletics, education, medicine, science, engineering technology and more.

We have also used federal, state and other grants to reach out into the community using faculty initiated research to address a broad range of problems important to the state regional and international communities.

We are currently providing support to Zanzibar in East Africa to develop text books and curricula to improve science and mathematics.

Located in Orangeburg, S.C., SC State was founded as a land grant college with a mission of providing education and service to the citizens of the state. In its first century, SC State was a leader in education and continues to lead the way into the next century.

MISSION

South Carolina State University, a senior comprehensive-teaching institution, is committed to providing affordable and accessible quality undergraduate and graduate degree programs.

This public university with a student population between 4,000 and 5,000 is located in Orangeburg, an area that has a traditional rural, agricultural economy which has expanded to include a business and industrial focus that is national and international in scope.

South Carolina State University's 1890 land-grant legacy of service to the citizenry of the state is ensured through its collaborative efforts with local, rural, and statewide businesses, public education, colleges and industry. This symbiotic relationship provides a catalyst that spurs reciprocal economic and social growth for the university, state, nation and the international community-at-large..

STATEMENT

South Carolina State University was created in 1896 in response to a challenge of federal legislation to provide educational access to the masses of people located in South Carolina. Historically, these masses were defined as “colored”. This legislative mandate has as its genesis the Federal Morrill Acts of 1862 and 1890. Under the Morrill Act of 1890, states were directed to use these funds to enhance educational programs related to agriculture and the mechanic arts. However, for those institutions using the funds they could not “discriminate by color or race” in the admission of students. Out of this history, separate institutions were created in the south to educate “colored” students and any other student choosing to attend these southern land grant colleges. Despite this history, South Carolina State University is fully accredited by the Southern Association of Colleges and Schools and is still working to be recognized as a land grant university in mission and funding for academic, research and extension programs.

QUOTE

“Among the sixty-nine institutions receiving some of the benefits from Land Grant College legislation are seventeen Southern Colleges listed by the United States Office of Education as “attended predominantly by Negro students.” In their own way, they are as unique in American education as the other fifty-two land-grant colleges and universities. Historically they have developed under entirely different conditions and with handicaps unknown to the other fifty two. They are the product of a social and economic pattern of a particular region rather than a nation. The Negro institutions have been and continue to be operating under a time lag of some fifteen to twenty-five years behind the other institutions with which they share the name “Land-Grant.” Their progress since the mid-thirties, however, shows ample promise of an erasure of that lag.”
