Savannah River Environmental Sciences Field Station

Announcements

Research Sites

Seeking prominent faculty mentors conducting cutting edge research in the sciences, math, and engineering. If you have funded research and would like to receive two talented Field Station interns to work with you this summer, please inform the program office immediately and submit a proposal describing the project. These interns will be supported by the Field Station program so there is no cost to you/your project. Contact the program office at 803-536-8859 for details. Deadline January 15, 2010.

Faculty

- Seeking energetic faculty to facilitate hands-on experiences in various natural resources and environmental science & engineering courses for interns. Competitive salary, housing, and course resources provided. Post-docs welcome to apply. Consult website for list of courses: http://www.cnrt.scsu.edu/fieldstation/pandc/2010courseschedule.pdf.

Teaching Assistants

- Seeking dynamic & energetic persons to provide instructional and clerical support for instructors and program office. Competitive salary and housing provided.

Interns

- Seeking highly motivated, outstanding students interested in a career in natural resources and environmental science & engineering to participate in a course-driven internship. Paid stipend & fees.
